

NPIC/D-20/70

20 JAN 1970

MEMORANDUM FOR: ODI Planning Officer

SUBJECT : Support Needs of the Center Through FY 1972

1. I do not envision any significant change, through FY 1972, in the level of support now being provided the Center by the DDS. As you are aware, the Center operates more as a field element than as a Headquarters unit, thus most of our budgetary needs in the areas generally associated with the DDS are covered in the Center's own budget submissions. An item contrary to this approach is the reimbursement for certain GSA support (24-hour coverage provided by electricians, engineers, and console operators) that recently surfaced. It is my understanding that the Office of Logistics, in addition to reimbursing GSA this year for this support, will continue to do so in the future.

2. Personnel position support by the DDS, as reflected in the Center's Support Services Division, is planned for at the same level through FY 72, with the exception of one position. That position, for a Commo Technician to handle secure telephone repairs, has already been discussed with the Office of Communications. Additional help, in the form of staff studies and analyses, may be required of the Offices of Logistics and Security as we look into the problem of the space needs of the Center in the mid-70's. We are not in a position at this time, however, to indicate more than the possibility of this requirement.
